# CeLAN Expansion Module (Ce-Ex)
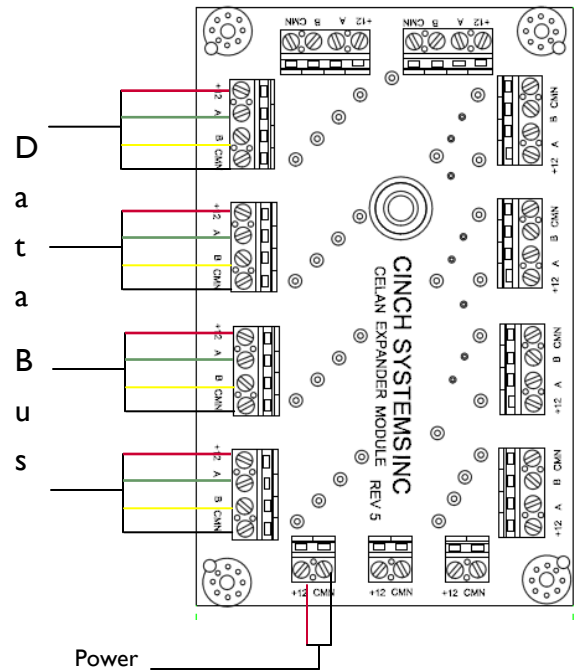

The CINCH Systems CeLAN Expander Module simplifies your installation by allowing you to interconnect up to 10 different CeLAN devices / wire-runs (+12 VDC, Bus A, Bus B, GND) on separate terminals. It also provides three sets of additional power and ground terminals for other powered devices. The module can be mounted into the Rampart Enclosure, Rampart Accessory Enclosure, or Custom Plastic CeLAN Enclosure w/ wall & cover tamper.

There are no limitations on the number of Expansion Modules on a system

Part # Ce-Ex
